PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundation in Full Stack Development and AI-driven systems. Experienced in designing and building scalable web applications using MERN stack and cloud-based architectures. Proficient in Data Structures and Algorithms with a focus on solving real-world problems, optimizing performance, and delivering user-centric solutions.

PROJECTS

ResumePilot — AI Resume Analysis SaaS

React Router v7, Node.js, Express, MongoDB, Gemini 2.5 AI, Tailwind v4

📅 2026

🔗 github.com/AbhayMahalle/ResumePilot

- Architected a full-stack SaaS platform utilizing React Router v7 and Vercel Serverless Functions to evaluate resumes against real-world ATS benchmarks, reducing manual review effort by **80%**.
- Engineered a secure, scalable REST API using Express.js and MongoDB with JWT authentication, optimizing the data pipeline for high-throughput AI operations and improving data handling efficiency by **60%**.
- Integrated Google Gemini 2.5 Flash and a server-side PDF processing pipeline to dynamically analyze resumes across 5 key metrics (ATS suitability, structure, content, tone, and skills), reporting **85%+ accuracy** in automated feedback generation.
- Developed a highly interactive, responsive dashboard using Tailwind CSS v4 and Framer Motion, featuring custom animated SVG score gauges and segmented charts that increased user engagement by **70%**.

Safe-Stream-Share — Secure Content Platform

React, TypeScript, Supabase, PostgreSQL, Tailwind CSS

📅 2026

🔗 github.com/AbhayMahalle/Safe-Stream-Share

- Developed a secure content management platform for controlled sharing of digital assets.
- Implemented Row Level Security (RLS) for strict data privacy and multi-user isolation.
- Designed token-based expiring links with access control to prevent unauthorized sharing.
- Optimized large file uploads using pre-signed URLs for scalable performance.

CampusKart — Campus Marketplace Platform

React, Python, TypeScript, Supabase, PostgreSQL, Tailwind, Vite

📅 2025

🔗 github.com/AbhayMahalle/CampusKart

- Built a full-stack marketplace for buying, selling, and flat listings with real-time chat.
- Implemented authentication and secure data access using Supabase RLS.
- Integrated real-time messaging and WhatsApp-based contact system.
- Developed search, filtering, and sorting for products and properties.
- Built a semantic ML-based recommendation system for personalized suggestions.
- Developed admin dashboard for moderation and user management.

STRENGTHS & SKILLS

Languages: C++, Python, JavaScript, TypeScript

Frontend Frameworks: React.js, Tailwind CSS

Backend Frameworks: Node.js, Express.js

Cloud and Backend Services: Firebase, Supabase

Databases: MongoDB, PostgreSQL, MySQL

ACHIEVEMENTS

- Secured **1st Place** in **Codeathon'26**, a Competitive Programming Contest conducted at **MMCOE, Pune**.
- Solved **700+ DSA problems** on **LeetCode** with a current rating of **1700+**.
- Scored **99.3 Percentile** in Maharashtra CET Examination.
- Scored **92.84 Percentile** in JEE Main Examination.

PUBLICATION

- Published "Smart Green Corridors: An IoT-Based System for Ambulance Route Optimization" (2025). [ResearchGate]

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Vishwakarma Institute of Technology, Pune

📅 2024 – 2028

- CGPA: **9.27** (through Semester IV)
